- 2 - School structures, individual performances and decisions: Spence's model
- 3 - The diffusion of cultural preferences: the logistical model

4 - The interdependence of the choice of a stream of study: Schelling's model

### **III - SIMULATION OF CHOICES OF STREAM OF STUDY**

- 1 - General Hypotheses
- 2 - Complementary Hypotheses
- 3 - Study of interactions between parameters
- 4 - The set of solutions
- 5 - Changes in the profiles of students in classical streams
- 6 - Results of the model
- 7 - Discussion of results
- 8 - Elements of a conclusion on the school choice simulation

### **IV - FORMAL THOUGHT AND THE REAL WORLD**

- 1 - Causality and conceptual construction
- 2- The nature of scientific explanation according to Filmer Northrop and Henry Margenau
- 3 - Prediction versus causal realism
- 4 - The hybrid nature of explanatory models
- 5 - Explanation vs. Argumentation
- 6 - The question of empirical adequacy
- 7 - The question of the validity of formal explanation

## ***Conclusion***

*Propositions concerning the evolution of the French secondary education system*

*The crisis of education in expanding educational systems*
